MEDICAL CASE SHEET (Continuation)

	Rank/Rate V / adm	Name Asif Hamayun
--	----------------------	----------------------

Date

CLINICAL NOTES (To be signed by M.O. giving Rank Name & Appointment in block letters)

4/7/23

Refer Form

70 yr old V/adm Asif Hamayun

(R) is old hypertensive. Now

presented with jaundice and

weight loss. On examination he

was icteric. His investigation

showed bilirubin 96 $\mu\text{mol/l}$

ALP 910 U/L. His CA 19-9 level

initially 2153 raised to 4000. His

CRP was 143. His CBC RFTs

were within normal limits.

CECT Abd showed dilated

CBD 1.8 cm with abrupt cut

off at distal end. Possible peri

ampullary mass. On MRCP dilated

CBD & stricture / mass at distal

end. His ERCP is stenting and Biliary done. Cytology was negative for malignancy. PET scan showed FDG density at Pancreatic head and Prostate although PSA was normal. Re ERCP with

stenting done due to blockage of stent. EUS & FNB done whose report is awaited. EUS findings were mass at head of pancreas of size 3.18×3.8 .
